Sub: Implementation of USSOR on Construction Deptt of Eastern Railway

Ref: Railway Board's letter No. 2010/CE-1(Spl.)/ IRUSSOR/W&M/1 dt.
25.10.11

The following procedure is to be followed for implementation of USSOR:

- (i) Since there are so many missing items for earth work and there is no provision for supply of blanketing materials and its compaction tests and also due to this there is wide variation in the cost of earthwork as per LAR and as per available items of USSOR, the execution of earth work, blanketing etc. should be done as per present practice i.e. through non-schedule items.
- (ii) Execution of other items can be done through the items of USSOR.
- (iii) For proper assessment of cost, the field Dy.CE/Cons are advised to submit the tender schedule (schedule wise) based on the non-schedule items i.e. as per present practice and also based on corresponding items available in USSOR to compare the schedule wise assessed cost as per Annexure-A. This annexure will be for internal assessment. After receipt of the tender schedule from field units and checked in PRD-cell it will also be finally verified by Accounts Department before calling any tender so that there will not be any confusion of assessed cost after opening of tender. This practice will be followed by each District/Division till such time sufficient LARs are available (to the satisfaction of concerned Chief Engineer) for the rates of USSOR and after that the tender will be called based on available LARs of USSOR.
- (iv) In the tender schedule a comparative table will be enclosed in the tender document as per Annexure-B (how the assessed cost has been arrived for better appreciation by the tenderers) and the tenderers will be asked to quote %above/below over the cost of USSOR as per Annexure-C.

This issues with Finance concurrence and the approval of CAO/Con.

DA: Annexure A, B & C.
