RECEPTION OF TRAIN ON A BLOCKED LINE

RECEPTION OF TRAIN ON A BLOCKED LINE

If a train is to be received on a blocked line then the SM will do as follows :

- *He will ensure that there is room for receiving and accommodating the train in question.*
- *If possible he should advice the SM of the block station in rear to inform the fact to the driver through T/409.*
- *The train in question will be stopped at the first stop signal*
- *Ensure that all the points on which the train has to pass are correctly set and facing points are properly locked.*

RECEPTION OF TRAIN ON A BLOCKED LINE

- *The train can be received by three ways:*
 - *By taking "OFF" 'Calling-ON' signal (if provided), or*
 - *By authorizing the driver to pass the approach Stop Signal at 'ON' position through the signal post Telephone (if provided), or*
 - *By authorizing the driver to pass the approach Stop Signal at 'ON' through a written authority i.e. from T/509. it will be served by a competent railway employee who will pilot the train into blocked line.*
- *The train being piloted shall be brought to stand at the first facing point leading to the reception line and the driver will proceed only after getting the proceed hand signal.*

RECEPTION OF TRAIN ON A BLOCKED LINE

Note:

- If the train is being received by taking 'OFF' Calling-on signal. There is no need to exhibit proceed hand signal at all. The driver will move on his own risk.
- If the driver is authorise on signal post telephone, a man must be deputed by the SM to exhibit proceed hand signal at the point.

RECEPTION OF TRAIN ON A BLOCKED LINE

- *The SM shall ensure that the driver is exhibited a stop hand signal at a distance of not less than 45 mtrs from the point of obstruction to indicate to the driver as to where the train shall be brought to a stand.*
- *The driver shall keep his train well under control while entering the blocked line and be prepared to stop short of obstruction.*

Thank you
